UX DESIGNER

YUKA LIVINGSTON

EXPERIENCE

Palo Alto Insight, UX Designer

March 2020 - Present

- Led UX design for 8 AI-driven products that serve 6 different industries ranging from e-commerce to mental health
- Collaborated with 4 data scientists and 2 software engineers which led to improved UX of data visualization and data labeling tools (e.g. categorical labels, continuous labels, and bounding boxes)
- Conducted 30+ UX sessions with users to gather data which informed the design of AI-driven, human-centered products

Lambda School, UX Design Team Lead

July 2019 - October 2019

- Mentored team of 8 UX designers to redesign the website of charity SpeakOut which helps underserved groups in Bahrain gain better English skills
- Increased team's velocity by 200% through spreading knowledge of efficient design tool use

PROJECTS

QualityHub: InterviewQ, Lead UX Designer

Oct 2019 - Jan 2020

- Led the research and design of a complex professional services website while constantly collaborating with 7 developers, which increased team unity and implementation speed
- Performed 15 usability tests which drove more than 150 wireframes iterations and 15 user flow optimizations
- Voted 1st place best product out of 20 products

ReadEasy, UX/UI Designer

Aug 2019 - Oct 2019

- Designed, prototyped, and evaluated an original app that aims to be the best way for non-native speakers to read Japanese
- Led meetings, user interviews, and usability tests while working closely with software engineers
- Developed and presented slides to communicate design clearly with others
